

**NEW & IMPROVED!**

Easily replaced filter makes  
monthly maintenance easy

**4x Faster Output**  
Than previous models

**Covers 1/2 Acre**  
Indoors and out

**Patented Dry Vapor**  
Design emits small particles  
for residue-free operation

**Quiet**  
High-volume blower and  
controller operates quietly.

**All-Weather Design**  
Rain and snow resistant to  
protect interior from the elements

**Insulated Compartment**  
Built-in heater keeps fluid warm for operation  
in cold weather

**Improved Filtration for Cleaner Output**  
Five filters (20% more than previous models)

**Easy to Read Display**  
Simple controls for customized operation times

**Custom Finish**  
High-quality powder coating

**New Sealed Circuit Board**  
Improved Solid State

# HOW IT WORKS

BirdBuffer® controls flying birds in open spaces by dispersing a safe, invisible vapor, using 20% Avian Control® Fluid (Methyl Anthranilate, or MA) or 40% Eco Bird® Fluid. This vapor is released at 60 mph, irritates the birds' eyes and mucous membranes without risk to their health or the health of nearby people. For the BirdBuffer® to be effective, the birds must be exposed to the vapor by flying through the affected area. After several returns, the birds learn that the vapor is in the area and find a different location for permanent roosting. The BirdBuffer® TDII is effective on grackles, pigeons, starlings, crows, seagulls and other flying birds. Smaller birds such as sparrows respond slower and may require additional stimulation, such as a BirdBuffer® TF or TR Kit, to activate them to fly more.

## Avian Control® Fluid #840005

Active ingredient has 20% Methyl Anthranilate (MA) - for use indoors or outdoors.

## Eco Bird® Fluid #840015

Contains 40% Methyl Anthranilate (MA) - for outdoor use

## Optional accessories for the BirdBuffer® TDII

**BirdBuffer TDII® Stand: #820064**

**Catch Tray: #820034**

**Floor Mat: #820057**

**Removable all-weather cover** protects the control panel but allows easy access for turning on and adjusting settings. Item #820054

Align the four mounting holes on the removable cover to the four mounting studs on the back of the BirdBuffer® TDII and press down to secure. Reverse process to remove the cover.

## Windicator Haze

Use Windicator® to see air movement for best positioning of your BirdBuffer® TDII Item #840000-B

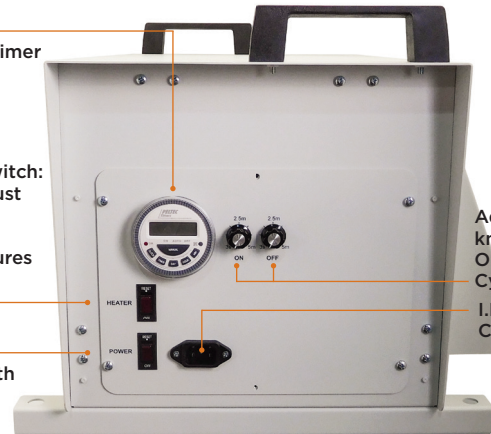

Built-in  
24 Hour Timer

Heater Switch:  
Heater must  
be turned  
on when  
temperatures  
are below  
55° F

Power  
Switch with  
circuit  
breaker

Adjustment  
knobs for  
ON/OFF  
Cycles

I.E.C. Power Cord  
Connection

## SPECIFICATIONS

The BIRDBUFFER® TDII developed and patented by BIRDBUFFER LLC  
Everett, WA USA  
P/N 800012

Weight	53 lbs
Size	23.25" x 16" x 12.25"
Shipping Weight	68 lbs
Shipping Box Size	24" x 18" x 18"
Nozzle Opening	2.25" X 2.25"
Fluid	*Avian Control® Fluid or Eco Bird 4.0
Type of Vapor	MA, grape scent, even, transparent, long-lasting
Fluid Consumption	1/2 oz per 1/2 hour or 1 gal 30 days
Output Speed	40 mph velocity
Output Distance	1/2 Acre
Warm Up Time	None
Operating Temp.	Avian Control: 0° - 104°F with heater Eco Bird: 35° - 104°F with heater
Sound Volume	70 dB at 10 ft
Continuous Vapor	Can run continuously
Duration Indoors	Vapor lasts 2-3 hours per 30-45 sec output use
Digital Control	Included: adjusts 0-4 min 15 sec both "on" and "off"
24 Hour Timer	Included
Circuit Breaker Switch	5 Amp Main Power 5 Amp Heater
Electrical Supply	120 VAC, 10 Amp
Accessories	1 x power cords - #830267 (Included) 4 x hanging cables with snap hooks - #820060
Accessories Not Included	Floor mat for chemicals - #820057 Drip pan for catching pouring fluids - #82034 Avian Control Fluid® 1 Gallon - #840005-B
